

A partnership with shared benefits

In recognition of the enormous value they bring to the Danforth Center, all Corporate Partners are listed on the Center's website and in various publications, including the "Leaflet" donor newsletter and annual report.

Corporate Partners who join at the \$1,500 level have the opportunity to appoint a representative to our Corporate Cabinet. Cabinet representatives connect with colleagues from other organizations who share a similar passion and commitment toward the success of our region.

Companies participating in the Danforth Center's Corporate Partners Program at various membership levels have the opportunity to receive additional benefits including:

- > Facility rental discounts
- > Private group tours
- > Exclusive presentations featuring Center scientists
- > Family plant science nights for employees

For a comprehensive list of Corporate Partner Benefits, visit www.danforthcenter.org/corpbenefits or contact Missy Miller at (314)587-1074.

DONALD DANFORTH PLANT SCIENCE CENTER
DISCOVER • ENLIGHTEN • SHARE • NOURISH

A world-class, not-for-profit scientific facility dedicated to improving the human condition through plant science.

Founded in 1998, the Center is home to more than 175 scientists utilizing state-of-the-art equipment in a unique, collaborative environment, with a goal to address 21st century global problems.

Dr. William H. Danforth
Chairman,
Donald Danforth
Plant Science Center

"The Center provides an opportunity to help feed the hungry, to protect the world's environment for our children and their grandchildren, to provide discoveries that will spark the next generation of science-based industry and make our region a world center for plant science."

Your tax-deductible contribution supports scientific excellence which benefits St. Louis and the world.

To learn more or join us, please phone Missy Miller at (314)587-1074.

PLANT SCIENCE CENTER

Corporate Partners Program
A shared investment in our region, our planet and its people

Creating a shared vision of excellence

The Donald Danforth Plant Science Center's Corporate Partners Program is designed to connect organizations of vision with the Center's mission of regional and global promise.

Our Promise, Our Mission: *Improve the Human Condition through Plant Science*

> Feed the hungry and improve human health

> Preserve and renew our environment

> Enhance our region as a world center for plant science

The Danforth Center's Corporate Partners understand the value plant science brings to our region, and the extraordinary impact our collective strengths can have around the world.

A global mission with regional impact

Though our reach is global, we are strongly committed to serving our region by way of providing:

EDUCATION & OUTREACH:
We offer a variety of K-12 initiatives, including a hands-on Tech Trunk program, designed to address the needs and interests of regional educators.

CAREER TRAINING:
Within our laboratories we are training the next generation of lab technicians and scientists through model programs and internships at the undergraduate and graduate level.

JOB CREATION:

The BioResearch and Development Growth (BRDG) Park at the Danforth Center provides emerging life science and clean-tech start-ups with resources needed to increase their chances of success – interactions between top scientists and access to state-of-the-art core facilities.

A solid investment in our region and beyond

Corporate Partners of the Danforth Center gain strong returns on their investment.

By supporting the Danforth Center's noble work through annual support, Corporate Partners provide unrestricted funds that allow the Center to:

- > Respond to new scientific opportunities that will improve the health of our planet and its people.
- > Advance education and outreach initiatives so learners of all ages within our community are further empowered through science and innovation.
- > Set priorities so the Center remains a global leader in plant science research.

In addition to annual support, Corporate Partners may choose to deepen their relationship by providing endowment support, ensuring the future of the Center and its critical work for generations to come.
